That's fine. I just realized this morning I hadn't hit send to forward to LDEQ, so just shot it over to them this morning.

Phaedra- thank you. I just have a few comments. For Housing Material Samples, I think the plan should default to wipe sampling for any hard surface (Sheetrock, wood, counters, etc..) and only remove the housing material if it is fabric or carpet type. Also, we should verify whether DI water and gauze or pre-prepared wipes are preferred. I would like to be consistent. I don't see info on the templet size/area to wipe. Need to be consistent.

3.1.3 discusses surface soil, but talks about going to a max of 15 ft. This is way deeper than what we we usually discuss surface samples.

Also, I would prefer clarification on sample locations, but I know that hasn't been firmed up yet. So maybe just a statement that exact locations will be approved by EPA before samples are taken.

Good Afternoon Bryant,

Per the request of Tim Powers, please find below a link to the Draft Technical Sampling and Analysis Plan for the Lard Oil Denham Springs Emergency Response. Let Tim or me know if you have any questions or concerns.

Thanks

Phaedra
